Surrounded in sound

The GXT 450 Blizz Surround Sound Gaming Headset delivers high fidelity gaming sounds and booming bass. With the virtual 7.1 surround sound and the 40mm speaker units, you are aware of everything happening around you: listen to your enemy's every move and respond quickly!

Flowing RGB lighting

Enhance your gaming look with the flowing RGB light effects on both earcups. The blazing rich colours of the Blizz headset will light up any gaming set-up.

Serious talk

This headset comes with a flexible microphone boom. This makes it easy to place it in front of your mouth and be heard by everyone. Because of the LED mute indicator light, you will know with one glance at the microphone whether it is turned on or off.

All in line

The GXT 450 has a nylon braided USB cable of 2m which allows you to move around freely during gaming sessions without the wire tangling up. The cable also includes an inline remote with volume control and lighting and microphone mute, making it easy to access and adjust the audio and lighting.
