

FUYL 5 Pro Advanced Bundle 1 Year - UK

Technical Specifications

Product Information

EAN	9347210007872
Brand	LocknCharge
SKU	10436071
Manu Part #	LNC10468

Design

Type	Portable device management cabinet
Door opening	Side opening
Door hinge	Right
Placement	Desk, Wall
Castor wheels	No
Product colour	Black, Grey
Door type	Single

Weight & dimensions

Height	593 mm
Width	528 mm
Depth	480 mm
Weight	35 kg

Features

Supported portable devices	Tablet
Number of devices supported	5

Product Description

Intelligent Asset Management System that charges, stores, secures and manages assets for most mobile devices in 5 or 15 individually lockable compartments. Compatible & Efficient Charging Lockers. All 5 or 15 compartments are equipped with a power outlet and a 2.4 amp USB port, so you can charge almost any device, including: iPads, tablets, laptops, mobile phones, Chromebooks and more¹. Intelligent Remote Management. Once FUYL Towers are connected to the local network, via Ethernet or Wi-Fi, designated admins can view, access and manage Towers from different locations through the local management portal. Network Connected. An optional Network Kit vastly expands the data transfer capabilities of the FUYL Tower 5 or 15 through individual Ethernet connections to each compartment. The Network Kit allows IT Departments to install a network switch to the top of a Tower and connect devices from each bay to a network, making it possible to re-image devices remotely. Physical and Digital Security. In addition to physical security, the FUYL Tower's embedded computer automatically applies security software updates as they become available. This feature ensures that for Towers connected to a network, security software is up to date and more prepared against cyber attacks. RFID Ready. The FUYL Tower supports almost every RFID standard on the market including HID and MiFare: (MIFARE Classic, MIFARE DESFire 0.6, MIFARE DESFire EV1, HID: iCLASS Standard/SE/SR/Seos; PIV II, Secure Identity Object (SIO). Reporting. Administrators can export FUYL Tower events into a CSV file for deeper analysis of charging locker usage. Two Access Modes so that organisations can set the FUYL Tower 15 to operate with what works best for their work flow. User Specified PIN (USP) Mode means that lockers are open so that the User can reserve a locker. It operates just like a hotel safe. Anyone can walk up to the Tower, select a compartment for their device and lock it using a PIN (digital keypad) or by scanning/tapping any RFID card. Admin Specified PIN (ASP) Mode puts locker access control in the hands of the Administrator. E.g. Storing/charging spare devices for rapid exchange (check-in/check-out) or assign compartments to a specific person or keep them locked and set on-demand access to devices. Open API. Organisations can build connectors for controlling doors and the display in a way that is customised for their work flow. [Click here and visit](#)

our developer site to access the FUYL Tower API, code samples and the latest docs. Visibility into Each Bay. Each compartment door has a hardened plastic window for viewing the contents inside. Window-blocking plates are also included for organisations that prefer locker privacy. Internal lighting illuminates each compartment to help users clearly see the device and to ensure safe removal of the device. Future-Proofed. Software and firmware upgrades available via the Management Portal. Active Directory Integration. With the ability to integrate with Active Directory, Tower administrators can log in to the Portal using their username and password stored on their on-premise directory. Curfew. Allows administrators to set time and days where the Tower can not be accessed by users. 4.3 Graphical Colour Display. In addition to online access to the Tower, administrative functions are also available from the LCD Control Module and Keypad. Administrators can unlock, inspect, quarantine, perform diagnostics and reset systems directly from the Tower. Sleek Design. The FUYL Tower's sleek, minimalist design adapts to any environment. Additional Storage Compartment at the bottom of the unit. Perfect for adding a UPS, small switches or other administration equipment. Tough as Nails. Designed with passive ventilation to minimise heat build-up during charging, the FUYL Tower stays cool under pressure, and it's backed by our lifetime warranty.
